

## THE TITLE OF THE PAPER GOES HERE, IN UPPER CASE

### Lead Author, Co-author One, Co-Author Two, Co-Author Three (First name and family name only, for each)

*Institute affiliation (the department, faculty and name of institute), Town, Country*

[leadauthor@email.com](mailto:leadauthor@email.com)

[co-authorone@email.com](mailto:co-authorone@email.com)

[co-authortwo@email.com](mailto:co-authortwo@email.com)

[co-authorthree@email.com](mailto:co-authorthree@email.com)

**Abstract:** *The abstract should be written italics, should be no less than 100 words and should not exceed 200 words and will be **formatted as one single paragraph** without any other styles, bullets and lists, **like this one**. It might be useful to those who are not experienced in writing abstracts to have a short note on how to write an Abstract. The single most important thing about an abstract is that it is a short document that is intended to capture the interest of a potential reader of your paper. Thus in a very important sense it is a marketing document for your full paper. If the abstract is poorly written or if it is boring then it will not encourage a potential reader to spend the time reading your work. Thus the first rule of abstract writing is that it should engage the reader by telling him or her, what your paper is about and why they should read it. With regards the body of the abstract you need to make a clear statement of the topic of your paper and your research question. You need to say how your research was/is being undertaken.*

**Keywords:** Include up to 6 keywords here, separated by semicolon; choose these carefully as they may ultimately be used by search engines, especially during computerised searches, to access your paper, and they should be the words which most closely reflect the content of the paper.

**JEL classification:** At least one code corresponding for your paper can be chosen from [http://www.aeaweb.org/jel/jel\\_class\\_system.php](http://www.aeaweb.org/jel/jel_class_system.php). Please **use the code only** (e.g.: A14), without including the description of the code (e.g. A14 – Sociology of Economics), separated by semicolon.

### 1. Heading: Generally Introduction or Background

This model paper contains information about the formatting requirements for the proceedings of this conference. Read this document carefully.

Format your paper in Arial 10pt throughout, using bold (for titles and headings only) and italics as appropriate. Do not use any formatted styles other than bullets where required for lists. We will apply all other styles when the paper is typeset. The paper should not exceed **4 pages**, including the abstract, figures and references, and references should be in the Harvard style (see below for further details - information on the Harvard referencing style can be found at: [http://www.ex.ac.uk/dll/studyskills/harvard\\_referencing.htm](http://www.ex.ac.uk/dll/studyskills/harvard_referencing.htm)). Papers accepted are published in conference proceedings.

## 1.1. Page size

The proceedings are produced on B5 paper. The page margins are 2 cm all round. Margins should be Fully Justified for main text, but Left Aligned for titles and headings. If you are using a Mac, please be aware that these settings may be adjusted in unexpected ways. The pages should not be numbered. Do not use multiple columns.

## 1.2. Typeset text

Use normal capitalization within the text and **do not use bold face** for emphasis. Italics are acceptable. All headings should use initial capitals of all words of 4 or more letters only, excepting for use of Acronyms. Please DO NOT use of footnotes and endnotes. Footnotes and endnotes are not permitted and papers containing them will be returned.

### 1.2.1. Sub-sections

You may use up to three levels of heading, as illustrated in this document. Do not use any further levels of heading.

*Leave here 1 empty row.*

### 1.2.2. Paragraphs and spacing

Before each level 1 heading, you should leave two empty rows (for example, see below, before **2. Title and authors**).

Before each level 2 and 3 heading, you should leave one empty row (see above, before **1.2.2. Paragraphs and spacing**).

There are no spaces between the paragraphs of the same heading.

*Leave here 2 empty rows. This is the first empty row left.*

*This is the second empty row left before the level 1 heading type to follow.*

## 2. Title and authors

The title of the proposed paper is most important. Short attention-catching titles are the most effective. However, it is also important, for a conference paper, to ensure that the title describes the subject you are writing about. The title of the paper should be written in upper case.

Multiple authors (maximum 4 allowed) from the same institution should appear as detailed at the start of this document.

Multiple authors **from different institutions** should appear as:

**Patrick Anonymous<sup>1</sup>, Second Author<sup>2</sup> and Third Author<sup>1</sup>**

<sup>1</sup>*The department, faculty and name of institute, Town, Country*

<sup>2</sup>*The department, faculty and name of institute, Town, Country*

[leadauthor@email.com](mailto:leadauthor@email.com)

[co-authorone@email.com](mailto:co-authorone@email.com)

[co-authortwo@email.com](mailto:co-authortwo@email.com)

Give first and last name, in that order. Do not use all caps. E-mail addresses should be given beneath, one per line and in the same order as the authors are listed.

*All author details will be removed by us before the double-blind review process.*

## 3. Figures and tables

You are invited to use figures and tables in your paper wherever they will help to illustrate your text. The proceedings are delivered to conference participants in electronic format and therefore support colour figures, however, the book version is printed in black and white and therefore you are advised to refrain from using colours to deliver important information in your figures.

### 3.1. Figures

Figures should be numbered consecutively throughout the paper and not numbered according to the section in which they appear. Figure captions should appear below the figure. Use the word Figure in full, and not Fig or F.

The figure below gives information about the placing of figures.

Pictures should be placed where you would like them to appear in the text. It may sometimes be necessary to move them to accommodate page=breaks etc., but every effort will be made to keep them where you have placed them. All figures should be centred on the page. Figures should be referenced in the text preceding the figure and captioned immediately below the figure.

**Figure 1:** This is how a figure should appear

Source: .....

Before the figure and after the figure's source you should leave one empty row. Due to the conversion process, some images can cause larger than necessary pdf. files. If you have complicated images, provide these as separate image files (edited to 300dpi) in either .gif or .jpg format as appropriate.

Linked diagrams, inserted from other packages, cause particular problems when typesetting. **PLEASE DO NOT DO THIS.** Instead create an image in a format as listed above and insert. It is helpful if you can upload the image as a separate attachment too, when submitting your paper in full.

Whilst every care is taken to ensure that figures are reproduced to a high standard, this does ultimately depend on them being supplied in the correct format.

### 3.2 Tables

Create tables using the table option of your word processing package. Do not use tabs and spaces. Before the table's title and after the table you should leave one empty row. See the example below.

**Table 1:** A sample table

Sample table for illustration		purposes
	Heading text	Heading text
Subject text	Detail text	Detail text
Subject text	Detail text	Detail text
Subject text	Detail text	Detail text

Sample table for illustration		purposes
	Heading text	Heading text

Source: .....

Tables should be set as "Autofit to contents" and centred on the page. If your table runs over two pages, please ensure that headings are also carried over. Do not allow rows to split across pages.

**4. Language, style, bullets and content**

The *language of Conference and publication* is English. All papers must be submitted in English.

With regards to English spelling and dialect, we prefer you to use British English, but Canadian, US etc. are acceptable provided they are used consistently. Hyphenation is preferred. To ensure suitability for an international audience, please pay attention to the following:

- Write in a straightforward style
- Try to avoid long or complex sentence structures
- Briefly explain all technical terms that may be unfamiliar to some readers
- Explain all acronyms at first use
- Explain all local references (e.g. not everyone is familiar with city names in a country).

The one exception to the use of normal style is the use of Bullets style to format bulleted lists (as above). Please use the small square bullet as shown. Other bullets style (e.g., like numbered bullets) may NOT be used.

**4.1. English proofreading**

Please note that if English is not your native language we recommend that you have your paper proofread by a fluent (preferably native) speaker as a poor standard of English may lead to your paper being returned.

Translation services: [Word2Word](#) offer translation services which you may wish to use.

**4.2. Page numbers, headers and footers**

Please do not insert headers, footers or page numbers. Do not refer to page numbers in your text as these will be different when your paper is published. You can refer to section headings only.

**5. Conclusion**

It is important that you write for a general audience. It is also important that your work is presented in a professional fashion. These guidelines should help to achieve that goal. By adhering to these guidelines, you help the conference organisers tremendously in ensuring impressive presentation of your paper and we thank you for your co-operation.

## 6. Acknowledgements

If you wish to make acknowledgements in your paper, these should appear immediately before the references at the end of the paper.

## References

References in the text of the paper should be in the Harvard style (further information on the Harvard referencing style can be found at: [http://www.ex.ac.uk/dll/studyskills/harvard\\_referencing.htm](http://www.ex.ac.uk/dll/studyskills/harvard_referencing.htm)) as follows:

Focusing primarily on trade policy, tax policy, and regional policy, Baldwin et al. (2005) show how these models can be used to make sense of real-world situations.

In principle, multiple saddle paths may correspond to a given initial condition, thus creating what Matsuyama (1991) calls an indeterminacy of the equilibrium path.

The second concentration mechanism is the input-output linkages induced by consumption and supply of intermediate goods (Krugman and Venables, 1995; Venables, 1996). The economic geography model in Krugman (1991a) was ...

In explaining the increased divergence in the distribution of economic activity between countries and regions, Krugman (1991a, 1991b) and Romer (1986) relied on models based on increasing returns to scale in production.

In macrophages,  $\Delta V_{px}$  replication is not detectable and this defect has been shown to be present at post-entry and before/during the reverse transcription process (Fujita et al., 2008, 2010; Srivastava et al., 2008).

“financial planning is an important and essential activity in any organisation” (Nugus et al., 2003).

The *Guardian* reported that twenty-nine inmates were participating in the programme (“Serving tim”, 1996: 21).

The semicolon can be used to separate two sections of a compound sentence that have a similar theme (Turabian, 1996: 56; Petelin and Durham, 1992:169).

The flora and fauna of Britain “has been transported to almost every corner of the globe since colonial times” (*Plants and Animals of Britain*, 1942: 8).

Eisenberg and Smith (in Bolton, 1986: 85) agree that "it is hard to assign general meaning to any isolated nonverbal sign".

You should list up to three authors. If there are more than three then you reference the lead author followed by et al. Do not use square brackets [ ] and do not fully capitalise names.

Secondary references would appear in the text as "Nugus (in Remenyi, 1999: 25) ..." and only the Remenyi work would be listed at the end of the paper. Further information on the Harvard referencing style can be found at: [http://www.ex.ac.uk/dll/studyskills/harvard\\_referencing.htm](http://www.ex.ac.uk/dll/studyskills/harvard_referencing.htm).

References should then be listed at the end of the paper in alphabetical order. Do not number references and do not use bullet points. References in the text should be in the format (Baldwin, 2012) and should then be listed at the end of the paper in alphabetical order as per the following examples:
