Address: Av. España 1680, Valparaíso, Chile, Valparaiso (Chile) | Website: <https://usm.cl/en/home/>

Master in Business Administration

Universidad Andres Bello [01/03/2015 – 01/10/2016]

Address: Republica 470, Santiago (Chile) | Website: <https://www.postgradounab.cl/magister-en-direccion-de-empresas-mba/>

Master in Public Health

Universidad Andres Bello [03/03/2016 – 09/08/2018]

Address: Fernández Concha 700, Santiago (Chile) | Website: <https://www.postgradounab.cl/magister-en-salud-publica/> | Field(s) of study: Health and welfare: • Health not elsewhere classified | Final grade: Summa cum laude | Thesis: Steam Sterilization evaluation devices: assessment and alternatives for hospital practices

PhD in Cybernetics and Statistics

Academia de Studii Economice din Bucuresti [01/10/2021 – Current]

Address: Str.Tache Ionescu nr.11, etaj 1, camera 8106. , Bucharest (Romania) | Website: <http://doctorat.ase.ro/noutati/szeged-conference-with-phd-session-22-23-march-2024> | Field(s) of study: Natural sciences, mathematics and statistics: • Statistics ; Health and welfare: • Welfare not elsewhere classified | Thesis: Epidemiological trends in OECD Countries and Economic Burden

As part of my professional journey, I have been a witness from a vantage point of some key trends in health care including access, health care expenditure, shifts of national health insurance towards private insurance, and the impact of the shifts between infectious towards non-communicable diseases in both developing and developed economies.

While pursuing a master's in public health, my research focused on the impact of surgical site infections and its prevalence due both procedurals' errors and infrastructure related issues. Although this topic remains relevant, during observational rounds and data gathering sessions across over 30 countries; it was rather clear that the largest portion of the surgical procedures were related to illness associated with non-communicational diseases, or in other words; could have been prevented at some point of the disease development, which triggered the interest in the topic.

My thesis is focused on expanding the understanding of the epidemiological trends to improve the quality and accuracy of the information available for policy makers and to enable a better understanding of these trends and its impact in the selected economies, which are arguably the most developed in the world. To that extent, the understanding of the trends prevalent on these countries can set the attention towards what other countries might be facing in the future, albeit with a delayed effect.

LANGUAGE SKILLS

Mother tongue(s): Spanish | English

Other language(s):

Portuguese

LISTENING C1 READING C1 WRITING C1

SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access / STATA - basic use / IBM Statistical package for Sciences (SPSS) / Social Media / Social Network / Video conferencingg / research and analysis / Scientific writing (scientific papers publication)
