

SUMMARY

Keywords: dual-use technologies, specialization structures, business models, external factors

In the framework of the research, I approached a complex thematic area, connected with the most relevant developments that have occurred in terms of operational specialization structures on an international level, with the object of technologies and goods that can have a dual use, both civil as well as military. I set out to test some working hypotheses chosen with great care, I proceeded to x-ray, carefully and for a methodologically sustainable time horizon, specific factual situations of an integrated mix of economic and non-economic aspects, with increased attention to the composition and handling of the methodological tools. I also took a position on the many dilemmas he considered insufficiently clarified. The most suggestive aspects that add value to this research can be considered: the structure of the working hypotheses; identifying analytical objectives and formulating pertinent conclusions, structured according to the argumentative complex at our disposal; scientific research in some demanding domain areas; the collection of analytical information, some quite difficult to obtain but very useful for the operationalization of the methodological apparatus; the way to approach some problems that only seem to have been clarified already. The results of this research indicate relevant influence relationships between dual technologies, business models, specialization structures and a number of external factors.

CONTENT

INTRODUCTION _____

1. CONCEPTUAL APPROACHES AND METHODOLOGICAL ASPECTS REGARDING THE CURRENT STATE AND PROSPECTS OF TRADE FLOWS GENERATED BY DUAL-USE TECHNOLOGIES _____

1.1. CONCEPTUAL DELIMITATIONS _____ Error! Bookmark not defined.

1.2. ANALYTICAL AND METHODOLOGICAL PERSPECTIVES ON THE BINOMIAL DIMENSION OF DUAL-USE PRODUCT AND TECHNOLOGY CONCEPTS Error! Bookmark not defined.

1.3. SOME DEVELOPMENTS IN THE GEOPOLITICAL CONTEXT OF THE PRODUCTION AND USE OF PRODUCTS GENERATED THROUGH THE USE OF DUAL TECHNOLOGIES _____ Error! Bookmark not defined.

1.4. THE MANAGERIAL DIMENSION OF SOME CHALLENGES RELATED TO DUAL-USE PRODUCTS _____

1.5. THE METHODOLOGICAL FOUNDATIONS APPLICABLE TO THIS THEMATIC AREA _____

2. MULTILEVEL AND MULTIPARAMETER ANALYSIS OF THE CONCEPTUAL PICTURE REPRESENTED BY DUAL-USE TECHNOLOGIES (DUS) _____

2.1. CLARITY VERSUS AMBIGUITY ON GEOPOLITICAL AND GEOECONOMIC COORDINATES _____

2.2. ANALYSIS OF THE MATRIX OF DETERMINANTS OF THE SPECIFIC INTERNATIONAL CLIMATE (POLITICAL, ECONOMIC, SOCIO-CULTURAL, TECHNOLOGICAL, LEGAL, ETHICAL AND ENVIRONMENTAL) _____

2.2.1. Analysis of the determining and specific factors for Central and Eastern Europe - the Danube macroregion

2.2.2. Aggregate synoptic picture analysis of global factors and regional sub-factors generated by global ones

3. ANALYSIS OF THE MOST IMPORTANT TRANSFORMATIONS THAT HAVE OCCURRED AT THE LEVEL OF INTERNATIONAL TRADE FLOWS

3.1. THE EXPORT CONTROL REGIME OF DUAL-USE GOODS, A SHAPING FACTOR OF TRADE EXCHANGE AND A GENERATOR OF SPECIALIZATION STRUCTURES _____

3.1.1. Product control lists, flow routing factor _____

3.1.2. Indicators with the help of which the most important changes in trade flows can be captured _____

3.2. THE MAIN FACTORS DETERMINING THE CHANGE OF THE CURRENT TRADE PARADIGM IN THE ANALYSIS-DIAGNOSTIC OF THE MAIN CROSS-BORDER TRADE FLOWS _____

3.3. ROMANIA'S PARTICIPATION IN TRADE FLOWS WITH DUAL-USE ASSETS. ANALYSIS OF OFFSET TYPE ARRANGEMENTS _____

3.3.1. Offset type contracts, as a specific regional factor _____

3.3.2. The typology of entities that use the offset variant _____

4. ANALYSIS OF THE MOST RELEVANT TRANSFORMATIONS THAT ARE OCCURRING AT THE LEVEL OF BUSINESS MODELS AND SPECIALIZATION STRUCTURES _____

4.1. SOME REDEFINITIONS AT THE LEVEL OF THE TYPES OF BUSINESS MODELS _____

4.2. ANALYSIS OF THE MAIN TRANSFORMATIONS THAT ARE OCCURRING AT THE LEVEL OF THE BEHAVIOR OF PUBLIC AND PRIVATE ACTORS PARTICIPATING IN THE GAME OF THE DUAL-USE TECHNOLOGIES MARKET _____

- 4.2.1. Identification of "dual-use" market models and structures (du) _____
- 4.2.2. The economic cluster model _____
- 4.2.3. Knowledge management at the business model level with dual-use products _____
- 4.2.4. Awareness and solutions _____
- 4.2.5. Correlativities and causal relationships on the cluster axis - business models of companies _____

4.3. HIGHLIGHTING THE MAIN CHARACTERISTICS OF THE DEFINING CORRELATIONS FOR BUSINESS MODELS THAT APPLY FOR THE EXAMPLE OF DUAL-EFFECT TECHNOLOGIES _____

- 4.3.1. Analysis of the specific aspects of militarily integrated groups _____
- 4.3.2. Enhanced military control on digital-dual models _____
- 4.3.3. Resilience and chain integration in geopolitical logic _____

5. THE NLD PREDICTIVE MODEL AS A FACTOR VARIABLE AND ITS VALIDATION, RECOMMENDATIONS AND FINAL CONCLUSIONS _____

5.1. KEY FACTORS OF A PREDICTIVE MODEL _____

5.2. ADDITIONAL VALIDATION OF THE MODEL THROUGH HYPOTHESES FOCUSED ON THE INFLUENCE OF SOME KEY FACTORS _____ Error! Bookmark not defined.

5.3. ITEMS DESCRIPTION _____

- 5.3.1. External factors _____
- 5.3.2. Analysis of some of the most commonly used dual-use technologies. _____
- 5.3.3. Specialization structures _____
- 5.3.4. Business models _____

RESULTS _____

DISCUSSIONS _____

CONCLUSIONS _____

BIBLIOGRAPHY _____

ANNEXES _____

LIST OF ABBREVIATIONS AND ACRONYMS _____

LIST OF TABELS _____

LIST OF FIGURES _____

LIST OF ANNEXES _____
